**Setting up your PumpSpy Sump Pump Smart Outlet** is very easy and only takes a few minutes. You can setup your outlet at a convenient location in your home and move it to your sump pump later. Don’t worry, the Smart Outlet will remember your settings.

**STEP 1:** Download and Install the PumpSpy Smart Outlet App from the App Store.

**STEP 2:** Open the app and create a new PumpSpy Account.
- After entering your info, press Done.
- Press the home button on your Apple device.

**STEP 3:** Plug in the PumpSpy Smart Outlet.
- Plug the Smart Outlet into any AC outlet.
- The LED ring will light up and turn yellow (setup mode).
- If the LED ring is not yellow, gently press and hold the button with the PumpSpy logo. The unit will turn yellow/enter setup mode after 3-5 seconds.

**STEP 4:** Connect to the PumpSpy Smart Outlet
- On your Apple device, open Settings.
- Select WiFi.
- Select the WiFi network named “PumpSpyOutlet.”
- Press the home button on your Apple device.

**STEP 5:** Setup the PumpSpy Smart Outlet
- Open the PumpSpy app.
- The PumpSpy app will ask your permission to send you notifications. Click OK.
- Select your WiFi network from the list of available networks.
- Enter the password for the selected WiFi network and press Done.
- A Success message will be displayed. Press OK.
- The LED ring will turn green. A Green ring means the outlet is connected to your WiFi and is ready for use.
- Continue the setup process on the app by entering the location of the Smart Outlet.

**STEP 6:** Enter Alert Contacts
- On the PumpSpy App, select Contacts.
- Following the onscreen prompts, enter cell phone numbers and/or email addresses that should receive PumpSpy alerts.

**STEP 7:** Connect Your Sump Pump to the Smart Outlet
(Refer to Owner's Manual)

**STEP 8:** Install the High Water Sensor (Refer to Owner’s Manual)
